

(BL259/2024-IST-ID)

**Research Studentships (Master or Integrated Master students)**

Applications are open for 1 Research Studentship, within the framework of project AHEAD (AI-Informed Holistic Evs Integration Approaches For Distribution Grids), co-financed by the European Commission (GA 101160665), under the following conditions:

**Scientific Area:** Software Engineering and Information Systems

**Admission Requirements:**

a) *To be enrolled at an integrated master or a master.*

*The candidate must also:*

b) *Hold a bachelor's in software engineering, computer science, or informatics engineering.*

c) *Have very good English written and oral skills.*

d) *Have knowledge of data science methods.*

e) *Have very good analytical skills.*

f) *Have very good programming skills in programming languages such as Python, JavaScript.*

**Workplan:** The AHEAD project will create a simulation environment capable of predicting the most convenient location to place the electric vehicle (EV) charging stations and optimize both the usage of the power grid resources, and the charging stations. This simulation environment will exploit the unique features of currently available AI models and include two layers: the spatial mapping one (placing the chargers where the people need them to be), and the power grid one (placing the chargers where the grid can host them).

Flexibility services will be designed and tested in the model, to minimize the impact of EV charging pools on the network, and ensure the consumers have economic benefits. Moreover, these smart charging algorithms will be tested in six demonstration sites, dedicated to assessing the technical and economic feasibility of smart charging light and heavy-duty EVs, and boats.

The selected candidate will be working on tasks related to the activities to be developed in Portugal, and on activities related to the charting of electric vessels.

- a) Research and development of data science pipelines to understanding vessel patterns
- b) Research and development of a machine learning pipelines for training and evaluating ML algorithms applied to vessels data.
- c) Assist the research team in the deployment and maintenance of the different technologies in the Funchal demonstrator.
- d) Assist the research team in producing reports and scientific presentations/publications.

**Legislation and Regulations:** Statute of Scientific Research Fellow, approved by Law nr. 40/2004, of August 18, as worded by Decree-Law nr. 123/2019, of August 28; IST-ID Research Fellowships Regulation, available on [https://ist-id.pt/files/sites/43/regulamento-de-bolsas-da-ist\\_id-2.pdf](https://ist-id.pt/files/sites/43/regulamento-de-bolsas-da-ist_id-2.pdf).

**Workplace:** The work will be developed at the Interactive Technologies Institute / LARSyS, under the scientific supervision of Dr. Lucas Pereira. The activities will be developed in the city of Funchal, where the demonstration activities will be conducted. The position is 100% on-site.

**Duration:** The research fellowship(s) will have a duration of 6 months. It's expected to begin on 12/2024. The research fellowship can be renewed for an additional 6 months based on the success of the developed tasks.

**Monthly maintenance allowance:** the amount of the monthly maintenance allowance is € 990.98, being the payment method by Wire Transfer.

**Selection methods:** The selection methods will be the following:

- a) Curriculum Vitae evaluation (70%)
- b) Motivation Letter (30%)
- c) Individual Interview (as a tie-break procedure, to be conducted online), to be conducted online

**Composition of the selection Jury:** Dr. Lucas Pereira (President), Prof. Hugo Morais, Prof. Augusto Esteves

**Announcement/ notification of the results:** The final evaluation results will be communicated to all applicants by email.

**Application deadline and formalization:** The call is open from October 25 until November 8, 2024.

- i) B1 Form – Fellowship application (<https://ist-id.pt/concursos/bolsas/> );
- ii) *Curriculum Vitae*;
- iii) Academic degree certificate, where applicable;
- iv) Proof of enrollment at an academic degree course (Master, Integrated Master);
- v) Motivation letter;

Applications must be submitted to the email: [dina.dionisio@tecnico.ulisboa.pt](mailto:dina.dionisio@tecnico.ulisboa.pt) (cc: [lucas.pereira@tecnico.ulisboa.pt](mailto:lucas.pereira@tecnico.ulisboa.pt) ) with the subject [AHEAD]: Application to BI-L2
